with Maple Veneer Pinstripes.
Two-Tone Stained Solid Maple base

ACRALYTE X

What is Acralyte X?

More than a coating, Acralyte X is a process.

It's a process we've honed through years of research with clients and engineers around the world to address the wide variety of needs our clients have and to offer them lasting value.

Acralyte X is chemically enginneered to achieve greater scratch, mar, chemical & heat resistance than traditional furniture finishes (such as epoxy resin, polyester resin, urethane and conversion varnishes).

ACRALYTEX

Why Choose Acralyte X?

Chemical & Alcohol Resistant
Exceptional Scratch & Wear Resistance
Now Heat Ring Resistant From 190 to 250 degrees
Anti-Microbial Agent Built into the Finish

Acralyte X will consistently outlast a similar style table that doesn't have an Acralyte finish. The value of extending the product's life is what makes TableTopics the most cost effective restaurant table manufacturer in the Hospitality Industry.

Distressed Oak Veneer
in a Sunburst pattern
with Aged Painted Effect.
Solid wood Tressel Base
